

Cellular Therapy Protocol

Placeholder document. Final clinical protocol will be provided by 1CELL Health medical direction.

Overview

Guidance for professional handling and administration of mesenchymal stem cells, exosomes, NK and Muse cell biologics.

Cold-chain handling

Verify container seal, download data-logger record, confirm temperature range on arrival. Store per technical sheet.

Application

Cellular therapies require application by the 1CELL medical team or a certified physician. Coordinate scheduling with logistics@1cellhealth.com.

Follow-up

Document lot COA together with the temperature log as part of clinical traceability.
