

Peptide & IV Protocol

Placeholder document. Final clinical protocol will be provided by 1CELL Health medical direction.

Overview

Reference protocol for peptide and IV peptide therapies distributed by 1CELL Health.

Reconstitution

Reconstitute under aseptic conditions with the diluent specified on the technical sheet.
Refrigerate reconstituted vials at 2–8 °C.

Administration

Route, dosing window and cycle are specified per product. Peptides are available without a professional account; verified professionals receive institutional pricing.

Storage

Unopened vials: refrigeration 2–8 °C. Avoid direct light and freeze-thaw cycles.
